

TESTIMONIAL

Steve Windsor of CONSULTEK contacted myself some months ago inviting Cyklop to participate in a new project involving a major manufacturer of roof felting materials. I had previously worked with Steve during his time at Hunter Plastics where Cyklop were instrumental in installing several semi automatic stretchwrapping machines, and therefore delighted to work with him again in his new venture as Managing Director of CONSULTEK Ltd.

Our current working relationship with Steve and Consultek has been extremely successful and thanks to his professional support Cyklop have already supplied some semi automatic machines and are now discussing fully automatic systems with his client. There is no doubt that due to his excellent relationship with this customer it has assisted Cyklop in moving forward rapidly and finding suitable solutions for their products, securement and presentation.

Cyklop very much look forward to working with Steve and Consultek on further projects in the future.

David Hearn
Managing Director for Cyklop (UK) Ltd.
