## Capital Project Management/Personnel Relocation/Retraining

At CONSULTEK we have 'hands-on' experience of the value of focussed project management, particularly large multi-layered projects involving multiple disciplines coupled to new product introductions or relocation of staff, our experience includes: -

- New factory design, layout and build for Injection Moulding, Automated Assembly, High Speed Packaging and Plastics Extrusion followed by relocation of all plant, personnel, raw materials and stock
- Major relocation of personnel to a new manufacturing site involving
  - *Skills assessments and grading*
  - *Relocation and new job function counselling*
  - *Introduction of new pay and reward schemes*
- Procurement and installation of plastics extrusion lines for pipe, profile and cellular extrusion, including full infrastructure changes, staff recruitment and training
- Remote management of a new large range of injection moulded products installed in a European plant, including product production and quality validation, supply chain implementation coupled to local on-site multi-branding.
- Introduction of multiple machine 'on-line' monitoring to a large volume multi-discipline plastics processing plant (Injection Moulding and Extrusion)
- Introduction of 'turn-key' extrusion tooling and lines involving process re-configuration, personnel retraining, new raw materials and new process procedures.
