

Testimonial

I worked with Steve when he was consulting for Marley Waterproofing part of the IKO Group. He was there to drive the turnaround of a site that was dramatically underperforming. He contacted me to help him recruit a Site Manager and an Engineering Manager to run the factory and develop their facility.

It was great to work with Steve there was always constant communication between us and he helped me to understand exactly what the requirements were for the new recruits, helping me to find them best people. Working with Steve was a pleasure he does what he says when he says and I look forward to working with him again in the future. Thanks Steve
